

SEAN M. O'BRIEN

Astrophysics Research Centre, Queen's University Belfast

Email: sean.obrien@qub.ac.uk | Website: <https://astro-sobrien.github.io/>

EMPLOYMENT HISTORY

Research Assistant - Queen's University Belfast, UK

Jun 2025 - present

Developing the `adler` package for the analysis of solar system bodies in LSST data.

(Contract end: February 2026)

EDUCATION

PhD, Astrophysics - Queen's University Belfast, UK

Oct 2021 - present

Thesis title: *Planet Hunters NGTS: No Planet Left Behind in the Next Generation Transit Survey*

Supervisors: Dr Megan E. Schwamb & Prof. Christopher A. Watson

Passed viva with minor corrections: July 2025

MSc by Research, Physics - University of Warwick, UK

Oct 2020 - Sep 2021

Thesis title: *Investigating atmospheric scintillation using NGTS photometry of bright stars*

Supervisor: Dr Daniel Bayliss

BSc, Mathematics - University of Warwick, UK

Oct 2017 - Jul 2020

First Class Honours

TECHNICAL SKILLS

I have extensive experience in using Python (`pandas`, `astropy`, `allesfitter`, `emcee`, `dynesty`, `ellc`, `multiprocessing`, etc.) for data reduction, analysis and visualisation of a range of datasets including both photometric and spectroscopic datasets. I developed a pipeline to parse and analyse large datasets of citizen science classifications. This pipeline also interfaced with MySQL databases used for the handling of these large datasets. I also developed a pipeline to search for periodic signals in sparse time-series data. I attended the Code/Astro workshop in 2023 where I learned the key skills for building publishable, open-source software packages. These skills include: using Git for collaborative coding; debugging code; developing unit tests; clearly documenting code; and releasing pip-installable software packages. I also have experience with shell scripting and cluster computing.

OBSERVING EXPERIENCE

Telescopio Nazionale Galileo / HARPS-N + GIANO-B (**7 nights**); Setting up Phase 2 for Gemini/Zorro, Gemini/GHOST and ESO-3.6m/NIRPS+HARPS observations.

OBSERVING PROPOSALS

Probing the limits of giant planet formation around low-mass stars - *PI*

0.5 nights on ESO-3.6m/NIRPS, ESO P111 (2023). Radial velocity follow-up of a planet candidate orbiting a low-mass host star. Oversubscription rate 7:1.

GHOST Characterization of a Low-Mass Exoplanet Host Star - *Co-PI*

0.95 hours on Gemini/GHOST, Gemini 2024A. Spectroscopic follow-up to determine the spectral type and stellar parameters of a low-mass star hosting a planet candidate.

Zorro Follow-up of an Exoplanet Candidate Transiting an Evolved Star - *Co-PI*

0.6 hours on Gemini/Zorro, Gemini 2023A. Speckle imaging to search for stellar companions to an evolved star hosting a planet candidate.

Zorro Follow-up of Transiting Exoplanet Candidates - Co-PI

1.9 hours on Gemini/Zorro, Gemini 2022A. Speckle imaging to search for stellar companions to three stars hosting planet candidates.

MENTORING AND TEACHING EXPERIENCE

Oct-Dec 2023 - Small group teaching and marking for first year undergraduate Physics course.

Jun-Aug 2023 - Supervision of summer student searching for correlations between Gaia parameters for the NGTS sample compared with the full exoplanet population.

Oct-Dec 2022 - Programming (Python) demonstrator for third year undergraduate Physics course.

SELECTED TALKS

ESO Stellar Coffee and Planetary Tea Talk, Munich, Germany *Nov 2024*

Planet Hunters NGTS: No Planet Left Behind in the Next Generation Transit Survey

NOIRLab FLASH Talk, (Virtual), Tuscon, US *Oct 2024*

Planet Hunters NGTS: No Planet Left Behind in the Next Generation Transit Survey

QUB Seminar 2022/2023, Belfast, UK *Nov 2022/Oct 2023*

Planet Hunters NGTS: No Planet Left Behind in the Next Generation Transit Survey

UK Exoplanet Meeting 2023, London, UK *Aug 2023*

Highlight Talk - Citizen Science Discoveries from Planet Hunters NGTS

Special EDI session talk - Equitea: Creating your own EDI initiative

Equitea Seminar, Belfast, UK *Jul 2023*

What is Equitea? (*Pitching the concept of a student-run ED&I initiative in our research group*)

National Astronomy Meeting 2022, Warwick, UK *Jul 2022*

Contributed Talk - Planet Hunters NGTS: No Planet Left Behind in the Next Generation Transit Survey

OUTREACH AND SERVICE

ARC Equitea Founder and Chair/Committee Member *May 2023-present*

Co-founder of ARC Equitea (initiative providing a forum to discuss ED&I issues in academia and develop possible solutions). Chaired committee until Feb 2024. Gave presentations on topics including gender biases and impostor syndrome.

QUB Astronomy Day 2023/2024 - NI Science Festival *Feb 2023/2024*

Created materials and ran activities for outreach day and gave short public talks promoting citizen science

NGTS Meeting LOC *Apr 2023*

Coordinated registration process; wrote information guide on local food & drink options; chaired sessions.

SCHOLARSHIPS AND FUNDING AWARDED

Royal Astronomical Society Travel Grant *Jul 2023*

£750 to support travel to La Palma, Spain to gain observing experience on TNG/HARPS-N

Emily Sarah Montgomery Travel Scholarship *Jul 2023*

£400 to support travel to attend Code/Astro workshop 2023 in Chicago, IL, USA
